1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Schatz (US/5,765,511).
3. Schatz discloses a method for operating a cooling and heating circuit of a motor vehicle driven by an internal combustion engine, the method comprising the steps providing a first cooling medium path (14, 18, 20,10) through a bypass conduit; providing a second cooling medium path (12) through a main cooler of the internal combustion engine, providing a third cooling medium path (22) through a heating heat exchanger (26), providing a fourth cooling medium path (32) through a heat accumulator (34), subdividing cooling medium flows through said paths by an electrically operated valves (16, 44); providing the cooling medium flows by at least one pump (20, 24); controlling said valves by a control unit in dependence on operational and environmental parameters as well as nominal values; arranging a third control valve (42) which is controlled by said control unit in said fourth cooling medium path and closing the third control valve completely or partially when a reference temperature of a remaining cooling and heating circuit exceeds a nominal value provided in said control
